## EXPERIENCE

### **Motadata, Ahmedabad — Software Engineer Trainee**

Sep 2021 - Mar 2022

Worked as an intern and fulfilled the tasks that used Socket Programming, Data Structures, Algorithms, Networking, etc.

### **College Finder, Jamshedpur — Python Project Instructor**

Jul 2021 - Sep 2021

Provided practical python projects to people from various professions and regions that led them to have a proper understanding of python programming language.

### **EnCube FabLabs, Gandhinagar — Electronics Specialist**

Dec 2020 - Mar 2021

Made projects using the concepts of electronics and communication, Arduino circuit board, and IoT

## PROJECTS

### **Read World Finances Handling — EDA using Pandas**

Explored real-world financial data of credit card customers.

### **Music Recommendation System — Decision Trees**

Performed recommendations on some users' dummy data based on their age and gender

### **Text Prediction — using LSTM Neural Networks**

Predict text using Keras LSTM neural network model.

## EDUCATION

### **SSIT, Bhat — B.E.**

Jul 2018 - Jun 2022

Studied the implementations of Electronics and Communications Engineering and carried out IoT and Arduino projects using those concepts.

### **St. Xavier's High School, Hansol — Intermediate**

Jul 2016 - Mar 2018

Studied the ideological facts of Science and Technology.

## SKILLS

MS Excel, SQL, Python, Machine Learning, Deep Learning, Data Manipulation, Power BI, Tableau, Data Structures and Algorithms, EDA, Java, C#, C++, GoLang

## LANGUAGES

English, Hindi, Gujarati
